

# INTERIOR SHIELD

*Protect your RV from stains and odors all year long! Revolutionary Green Nano-Technology is 100% clean, clear and safe for your entire family!*

One application is all you need for year round protection. **Interior Shield** is sprayed as a clear, super-fine mist and covers every inch of your upholstery and ventilation system. **Interior Shield's** unique nano-technology allows it to organically bind to any surface it is applied to, creating an invisible barrier against:

**Stains:**

wine, soft drinks, urine, cooking oil, waxes, crayons, ink, etc.

**Odors:**

tobacco, pets, food, garbage, odors coming in from outside the car, etc.

*Protect your investment, and extend the life of your RV!*

**Titania** is a permanent, invisible coating which protects RVs, inside and out, from the sun's harmful rays, fading, cracking, chipping, oxidation, staining and odor buildup.

Exterior Shield locks in the color and shine of the paint without adding any haze or foggy finish. Titania bonds to the surface of the RV, creating a hard protective shell with UV blocking properties.

Awning Shield has the same UV blocking properties, with the benefit of preventing fabric wear and tear. Interior Shield coats every inch of the upholstery, ventilation system, floor and ceiling to prevent fading, staining and odor contamination.

After just ONE application, TITANIA will be permanently bonded to absolutely every surface inside and out.

During the application the water-clear liquid is sprayed out as a super-fine mist, efficiently covering every inch with no visible residue.

TITANIA does not contain any harmful chemicals, toxins, or poisons. It is completely safe for contact with children, animals and food.

Odors represent a much deeper problem, one of contamination and decomposition. TITANIA keeps this problem from spreading, creating a clean and healthy environment.

TITANIA does not cover up the odor with it's own. The area will smell clean, fresh and clear.

# EXTERIOR SHIELD

## Permanent Paint & Alloy Protectant

Maintain the color and shine of your RV's paintjob, while protecting it from scratches, UV and Ozone deterioration, chipping and fading with an invisible hard shell. This "hard shell" forms on the surface, above the factory materials that make them virtually impervious to daily organic matter, solid, liquid, or airborne contaminants. Titania earns a 9H Pencil Strength Rating, 2-3 times stronger than today's OEM paints and equal to or exceeding most factory "strong" clear coats. Apply **Exterior Shield** to your wheels to keep them clean from brake dust, pitting, road grime, mud, UV or Ozone deterioration. Simply rinse with water to clean. **Titania Shield** products contain no harmful chemicals or toxins, and are completely safe for the environment.

**Exterior Shield** is also a permanent vinyl protectant which will lock in the color of your awning or cover, and protect it from fading, staining, oxidation, cracking, UV or Ozone deterioration. Convertible soft-top awnings and covers are the first to show fading and deterioration due to the sun's harmful rays. Keep them looking as good as new for many miles down the road with **Titania**.
