

I was with my Azera in for service and I was complaining about the smell in the AC. Since I am a smoker the AC get a certain smell from the smoke. I ask the service tech to get the smell out of the car and the suggest to get Titanica for a small fee & I did. After I put it in the car was sitting in my garage for about 6 weeks I started it back up & there was no smell and I am very happy about it.

Thanks
Hyundai of Tempe for your good service
