To Whom It May Concern,

My name is Andrew Pongracz and I am the Offensive coordinator for the varsity football team at Highland High School in Gilbert AZ. Prior to the beginning of the '08 football season our locker room, showers, restroom area, helmets and pads were treated with Titania and I have never seen a more valuable and worthwhile product!

I have been in and around the game as a player and a coach for more than 25 years, and in that time I have seen and smelled some messy locker rooms, pads that just don't smell clean after two-a-days, and have seen players miss practices in a domino like effect as some bacteria is passed from player to player throughout our locker room. This season I witnessed some amazing differences.

Overall we lost fewer players to practices and the like as the number of players out sick was significantly decreased. As anyone around the game can tell you, that by itself is a very valuable component to gaining a winning edge. The locker room never got that musty moldy scent it had in past seasons and was actually not just bearable but the preferred location for position meetings. And when the pads were turned in after a very disappointing quarterfinal playoff loss they had a dry feel and smelled about the same as they had they day we handed them out.

I am just a simple football coach, I don't know the science behind Titania but I do know it was a very valuable member of our team this year. I can not recommend this product highly enough and would suggest to anyone with whom winning is important to make this a permanent part of the locker-room and work out environment. It is an amazing product and as I have said previously really helps any program or team gain a valuable winning edge.

Regards,

Andrew Pongracz
